Rohrer's Canadian Victory Seed Oats

Grains very plump, large, heavy, and white. Believe this is the heaviest Oats grown. The straw in tall, stronger and stiffer than any other sorts, and does not easily lodge. This is a tree type Oats. Densely branched, which contains a large number of heavy kernels. Any one who wants a large yield of plump Oats that cannot be equaled for feeding qualities, should plant Rohrer's Canadian Victory Oats.

P. L. ROHRER & BRO., Smoketown, (Lancaster County) Pa.

**BUREAU OF PLANT INDUSTRY,
U. S. DEPT. OF AGRICULTURE,
WASHINGTON, D. C.**

For a Successful Season Plant Rohrer's Quality Seeds

It's What People Think of Rohrer's Seeds that Sell Them

Domestic Brand Red Clover

It is by far the most important clover in our country. Maybe you can buy Red Clover cheaper, but, believe this, the price won't be the only thing about it that's cheaper. You know, we're sure, as every intelligent farmer knows, that second grade products are always expensive. So buy quality seeds at a reasonable price—a lower price than it's been for several years.

Lewistown, Pa.—Seeds and everything I ordered from your Catalog was of the very best quality. I can truthfully recommend you as reliable and honest seed growers.

Northwest Alfalfa

Rohrer's Northwest Alfalfa insures successful stands. Alfalfa can be grown on every farm. It excels in feeding value. As a hay crop always brings top prices. Can make two and three cuttings in a season. Its long, strong roots break up the subsoil and it adds more nitrogen to the soil than any other crop, except Red Clover. Should be sown on well drained ground.

Danielsville, Pa.—I was well pleased with the seeds I received from you last year. Especially the Alfalfa seed. I found it quite clean from weeds and of good germination.

White Sweet Clover

A valuable crop for pasture or soil improvement and serves to inoculate the soil for future Alfalfa crops. Grows on poorer land than Red Clover or Alfalfa. Our seed is Northwest Grown and is scarified seed. Will test 99.50% pure or better.

Maryland—I like your seeds well. I can buy cheaper seeds, but it might be cheaper quality. I expect to order my seeds from you again in the Spring.

Rohrer's Fancy Timothy

It is the most valuable of all grasses. A good stand is easily secured. It is used more extensively with clovers than any other grasses. Grows rapid and produces lots of hay. Our Fancy Timothy tests 99.70% pure.

West Virginia—Permit me to say that you have always dealt fairly with me. I have always considered you as one of the very best places from which to buy.

Swedish Select Seed Oats

Quality of Oats is just as important as it is with Clovers. Our Swedish Select Oats grown in the North, especially for seed purposes. Swedish Select Oats is a main crop variety and a good yielder. Straw tall and stiff. Branching type.

State College, Pa.—I can freely state that anything I ever received from you was very good and satisfactory.

Swedish Star Oats

A New White Oats of excellent quality. This Oats was originated in Sweden and is the result of a cross between Victory and Crown Oats. One of the heaviest yielding oats in Sweden. Straw is thick walled, medium to tall, very stiff, with strong root system so that the crop will stand up well.

West Virginia—We have been using your seeds for several years and find them exactly as you recommend them to be.

Soy Beans

No crop has gained popularity as rapidly as Soy Beans. Soy Beans can be made to produce great quantities of feed and will increase the fertility while doing it. Sow two bushel per acre for hay. Do not sow before the ground is warm.

Virginia—I assure you I am satisfied with the service and quality of the seeds you have shipped me.

Domestic Rye Grass

One of the best grasses for a cover crop. A good rye grass cover crop, turns over in a mass like a real sod when plowed. Among the most important characteristics of Rye Grass is its deep rooting system. Sow about 20 pounds per acre.

Weedville, Pa.—I think you people have the best seed I have ever bought. I am waiting on your seed book to get my order in early this year.

DeKalb Hybrid Corn

40,000 Acres of DeKalb Hybrid Corn will be
Planted in Pennsylvania in 1941

DeKalb No. 410. 90 Days. Short stalked. Outstanding for rich soil. Very deep kernels. Medium Flats, \$7.00 bu. Thick Flats, \$6.50 bu. Medium Rounds, \$6.00 bu.

DeKalb No. 606. 100 Days. Wide climatic and soil adaptation. Stands drought. Long eared, high yielder and good shelling percentage. Medium Flats, \$7.00 bu. Small Flats, \$7.00 bu. Thick Flats, \$6.50 bu.

DeKalb No. 628 A. 110 Days. Wide soil type adaptation. Medium height stalks, good root system. A good rugged hybrid. Medium Flats, \$7.50 bu.

DeKalb No. 821. 115 Days. Medium fodder, medium depth of kernel. Ears long, and uniform in appearance in field. Heavy yielder. Easy husking, Performs well on a wide range of soil conditions. This variety only in Thick Flats at \$6.50 bu.

DeKalb No. 821 B. 115 Days. This sort does a very good job on poor soils. Good yielder. Ears long with long shanks. You will not go wrong in giving this number a trial if your season is long enough to produce. Medium Flats, \$7.00 bu. Thick Flats, \$6.50 bu. Medium Rounds, \$6.00 bu.

DeKalb No. 827. 115 Days. Excellent standing ability. Easy husking. This is a sort that has proven its worth, and a very popular sort in the 800 series. Uniform in growth. Good yielder. Give this number a trial. Does good on a wide range of soils. Medium Flats, \$7.00 bu. Thick Flats at \$6.50 bu.

DeKalb No. 840. 115 Days. Very healthy stalk and root system. Unusual standing ability. Stalks stay green after ear is ripe. Medium Flats, \$7.50 bu. Thick Flats, \$6.50 bu. Medium Rounds, \$6.00 bu.

DeKalb No. 899. 125 Days. A very outstanding silage corn, because of its large stalks, heavy leaves and high yields. Stands well and is adapted to a wide range of soils. Medium Flats, \$7.00 bu. Thick Flats, \$6.50 bu. Medium Rounds, \$6.50 bu.

We pay freight on 2 bushels or more of Hybrid Corn. If you need corn, we would say order now. Stocks are getting low.

Selected Seed Corn

90-Day Yellow Dent. This is the earliest corn listed. Ears grow from 7 to 9 inches long, 14 to 16 rows to the ear. A good Variety where the season is short.

Red Cob White Ensilage. Grows tall and leafy. Ears good size. We can recommend this variety where the season is not too short.

Heavyweight Sure Crop. This corn was developed in Lancaster County. Is a cross of the Lancaster County Sure Crop and the White Cap Yellow Dent. Combines the good qualities of both. Give this corn a trial.

Lancaster County Sure Crop. One of the best varieties for cribbing as well as for ensilage. Produces an enormous crop of fodder, and a good crop of grain.

Stocks of Good Seed Corn are the shortest for many years. Will fill orders just as long as our supply lasts.

P. L. ROHRER & BRO., Smoketown, (Lancaster County) Penna.

Issued March 18, 1941 **PRICE LIST** Issued March 18, 1941

All seed guaranteed to please you. Freight is paid on orders of 125 lbs. or over. Bags are free. Prices on Seed Seed Potatoes and Onion Sets are F. O. B. Smoketown, Freight or Express charges collect. Add "Extra" for Postage if you want Field Seeds shipped by mail.
